

Managing the Website Roster & Impact Stats

Prepared for: Leonard Scarboro, Director - D.A.R.E. Ministries

Where: whofixedtheroof.com/roster

What This Is

The website now has a private admin console just for DARE leadership. From any computer or phone, you can:

- **See every volunteer signup** the moment it comes in - name, contact info, skills, and availability
 - **Track follow-ups** - mark each volunteer as New, Contacted, Active, or Inactive, and keep private notes
 - **Read contact-form messages** like an email inbox
 - **Update the Impact Stats** shown on the public site - no technical steps at all
 - **Export the roster** to a spreadsheet (CSV) any time
-

Logging In

1. Go to whofixedtheroof.com/roster
2. Sign in with the email address and password for your D.A.R.E. Volunteer Portal account
3. Your account must have **Coordinator** access; the site returns you to the roster after sign-in

Use **Forgot your password?** on the sign-in page if you need a reset email. Do not share your account password with anyone else.

The Three Tabs

Volunteers

Every signup from the website's Volunteer Interest Form, newest first. Use the search box or the status/availability dropdowns to narrow the list. **Click any row** to see the full details, change their status, add notes, or remove them. The **Export CSV** button downloads the list for use in Excel or Google Sheets.

Suggested workflow: new signups arrive as **New** to after you reach out, mark them **Contacted** to once they join a deployment, mark them **Active**.

Inbox

Messages from the website's contact form. Unread messages have an orange bar and a count badge. Click a message to read it (this marks it read automatically).

Impact Stats

The six numbers shown in the "Our Impact" section of the public website. Change any number, click **Save Numbers**, and the site updates within a few minutes.

Important: The site currently shows **placeholder/test numbers**. Please replace them with real figures before DARE goes fully public. Round estimates are fine - 150 displays as "150+".

Email Notifications

You also get an **email notification** each time someone signs up to volunteer or sends a contact message, so you don't need to check the console daily. (Ask Mason which address these currently go to.)

Questions?

Contact Mason Foley for technical help, Coordinator access, or importing your existing volunteer spreadsheet into the roster.

Roster console added July 2026. Database runs on Netlify DB (Postgres).
